WORK EXPERIENCE

2018 - 2020   GroupBy Inc.
Software Developer

- Maintain, build, test the front-end React/Redux client-facing web application for search experience optimization
- Own the front-end analytics experience of the product including architecting the state management and component structure along with coordinating with other teams
- Provide solutions in a Java 8 Spring Boot API for users to upload large amounts of data, loosening the dependency on an older system
- Pushed for and successfully moved off a development environment and its set of limitations using docker-compose
- Plan, prepare and execute deployments, validating success/failure, and checking for regression errors
- Onboard, consult and provide technical input to internal and external team members

2018 - 2019   Juno College of Technology
Mentor - Part Time Web Development Course

- Supported students during class time to ensure their pace of learning is steady
- Reviewed student projects and provided feedback
- Lead code-alongs for coding exercises like form creation
- Compiled main takeaways after each class

EDUCATION

2017 - 2018   Juno College of Technology (formerly Hacker You)
Web Development Immersive

2012 - 2016   University of Waterloo
Bachelor of Science, Honours
